TECGLASS
DIGITAL GLASS PRINTING BY FENZI GROUP

The Glass Industry's Premier Trade Shows: GlassBuild America and Glasstec are here !

A frenetic end of the year awaits us with the arrival of the two most significant trade shows for the glass industry: **GlassBuild America** and **Glasstec**. These events serve as vital platforms for industry professionals to connect, showcase new products, and discuss emerging trends, and how could it be otherwise, from **Tecglass Digital Printing by Fenzi Group** we will be attending both events together with the Fenzi Group.

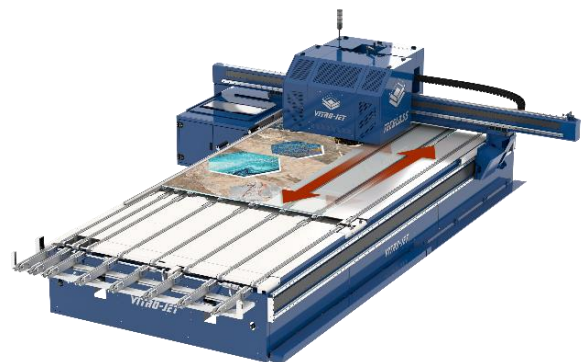

We would like to give you a summary of what you can find in both fairs by Tecglass, and as usual, we really look forward to reconnect with all our customers and visitors to show our latest developments in digital printing technology during these two exciting editions that lie ahead.

GlassBuild America, the largest annual trade show in North America dedicated to the glass, window, and door industries and that this year premieres its Dallas (TX) edition. The event will take place from Mon-Wed, Sept. 30-Oct. 2 at Kay Bailey Hutchison Convention Center in Dallas – Texas.

With more than 9,000 visitors per edition and more than 490 exhibitors, Glass Build America has once again become, as every year, the reference event in America for the glass industry, an unmissable show for a market in continuous growth and importance for Tecglass, and for which we have recently strengthened our position for customer service, through the implementation of a business unit in Downingtown (PE), which allows us to provide after-sales service directly from the USA to all our customers and partners. Visitors may find us at **booth 45037** jointly with Fenzi Group.

For this edition at Dallas, we have counted with the cooperation of **Precision Glass Industries**

<https://precisionglassindustries.com/> - a company headquarter in Houston, Texas, specialized in fabricating custom high-quality glass solutions, ranging from exquisite shower doors and enclosures to commercial insulated glass, laminated glass, and a variety of glass architectural elements, including railings, wall partitions, and heavy glass entrance systems

Vibro-Jet FS Type digital printer on display during GBA.

We have recently forged a new partnership with Precision Glass Industries and we have had its full cooperation to have on display his brand-new digital printer for architectural applications, model **Vibro-Jet FS Type for a maximum glass size 2.800 x 6.000 mm**. The printer will be on display during the 3 days of the fair performing different exhibitions

showing our visitors the great variety of possibilities offered by multicolor printers for different applications. In addition to the digital printer, our sales team will be available to all visitors to present the advantages of digital printing on flat glass and all the opportunities that open up for various markets and applications such as **Architecture, Automotive, Commercial Refrigeration** and **Home Appliances**.

glasstec

**INTERNATIONAL TRADE FAIR FOR GLASS
PRODUCTION • PROCESSING • PRODUCTS**

Glasstec, held biennially in Düsseldorf, Germany, is the world's leading trade fair for the glass industry. It attracts a global audience, making it a pivotal event for international networking and collaboration bringing together industry professionals, innovators,

and thought leaders from around the globe to explore the latest advancements, technologies, and trends in glass production and applications. Glasstec has clearly underscored its relevance for the global glass industry with its restart as a face-to-face trade fair after the pandemic induced break. With more than 936 exhibitors from 47 countries and more than 30,000 visitors from 119 countries make this fair a unique world reference.

Glasstec will be held from 22-25 October at Düsseldorf Exhibition Centre. Together with the Fenzi group we will be attending this unmissable event at **Hall 16 stand B40**, with a booth of more than 1,000 square meters where we will have an impressive set-up with **a complete digital line of Vitro-Jet FS Type for maximum glass size 2.500 x 4.500 mm** intended for architectural applications and a **Single Pass Evolution digital printer** for automotive applications on display, both of them performing constant demonstrations during the 4 days of the event.

Complete **"Turn-Key"** digital printing line of **Vitro-Jet FS Type** on display during Glasstec.

Single Pass Evolution digital printer on display during Glasstec

Both **GlassBuild America** and **Glasstec** play crucial roles in the glass industry, providing platforms truly relevant for innovation, education, and networking with existing customers and new visitors under the same roof.

Whether in North America or Europe, we invite you to discover a world of digital printing opportunities and we look forward to see you there !

Go Digital !

EMIRATES GLASS LLC expanding jumbo size solution with Tecglass Digital Printing Technology.

Emirates Glass LLC is a leading manufacturer and supplier of premium architectural glass products based in the United Arab Emirates. Emirates Glass LLC has taken another technological leap **with the acquisition of Tecglass Vitro jet FS Side Kinetix** digital printing production line. This strategic investment underscores Emirates Glass's steady commitment to innovation and excellence, propelling the company into a new era of digital printed glass production.

The Vitro Jet FS Side Kinetix is a specialized model within the Vitro Jet series by Tecglass, tailored for high-performance digital printing on glass for jumbo sizes. Side Kinetix Technology performs printing in the longitudinal direction, it is achieved to print always performing printing by the longer side of the glass, making the most of the printing time. Ideal for printing on large glass panels used in building facades, windows, and other architectural elements.

Rizwanulla Khan, Executive President of Emirates Glass, expressed his

enthusiasm for the transformative potential of this acquisition stating, "The addition of the Vitro-Jet FS digital printing production line marks a pivotal moment for Emirates Glass. This cutting-edge technology empowers us to deliver innovative, customized glass

solutions on a scale never seen before. We were already familiar with this technology as we had another Tecglass digital printer machine in our facility in Saudi Arabia. Decision was easy for us once we analysed all the aspects, Tecglass is a worldwide well-known company and the most advance technology with unique features as recirculation system, highest resolution, or side kinetix technology. We are extremely satisfied with the service provided by Tecglass and are pleased to continue our collaboration by

acquiring the second printer for our group. New digital line that allows us to process a **maximum glass size of 3.300 x 8.000 mm**, which perfectly fits with our tempering capabilities. Tecglass had the capacity to offer us a Turn-Key project, including all the machines that make up our digital line and of course all the ceramic inks that we use in it.

The digital printing line concept supplied by TECGLASS allows a fully automatic glass processing from input to output, reducing to a minimum the human resources required for its daily operation, giving a complete solution for the customer.
